

***Jamestown Area School District***  
***State Health Requirements for School Entry***

**The Pennsylvania Department of Health requires students to have current physical exams in grades K, 6 & 11 & current dental exams in K, 3 and 7. Both must be up to date for new students upon entry into the school district. Immunizations must be up-to-date as determined by the Pa Department of Health. Please place your child's physical & dental forms and current immunization record in an envelope and turn in to the Jamestown Area School District Secretary prior to the first day of school.**

We suggest these exams be completed by the student's own physician and dentist. It is felt that your child's own health care provider is in the best position to evaluate your child and follow-up with necessary care. This ensures continuity of care.

Physical and Dental appointments will need to be made in a timely manner to ensure all necessary health information is turned in before the first day of school.

Immunizations may be provided through your local State Health Department at a lower cost.

Mercer County State Health Department      724-662-4000

Crawford County State Health Department      814-332-6947

In the rare event that your child needs medications administered during the school day, please contact me to discuss the necessary physician documentation and medication administration protocol. You may also contact me regarding other health concerns for your child. I may be reached at 724-932-3181. I am anticipating a great school year!

Sincerely,

*Cindy Micsky*
